

DIAGNOSTIC RECOVERY WORKBOOK

Georgia Retake Recovery Plan

Turn the PSI diagnostic into a root-cause repair, weak-area targets, evidence gates, and a safer retest decision.

START Score report	CYCLE 14 focused days	GATE Evidence, not hope

PSI Georgia Candidate Information Bulletin, 7/1/2026

Do not repeat the same preparation

RECOVERY RULE

The score report is a map

A failing PSI score report includes diagnostic strengths and weaknesses. Use it to change topic allocation, question review, and test behavior before you spend another \$175.

Diagnostic intake

Evidence	Write it here	What it changes
Overall result	_____	Distance from passing is context, not a study plan.
National subtotal and weak areas	_____	Select highest-weight national repair targets.
Georgia subtotal and weak areas	_____	Protect the 52-question state supplement.
Math pattern	_____	Separate setup errors from arithmetic errors.
Timing or fatigue pattern	_____	Change pacing, sleep, or simulation conditions.
Confidence pattern	_____	Track confident wrong answers as priority misconceptions.

Root-cause sorter

Error type	Diagnostic test
Knowledge gap	You could not state the rule before reviewing the explanation.
Distinction error	You knew both terms but applied the wrong one to the facts.
Stem-reading error	You missed EXCEPT, BEST, timing, role, or jurisdiction.
Calculation setup	You chose the wrong base, units, formula, or rounding rule.
Retrieval failure	You recognized the answer after seeing it but could not produce it under pressure.
Performance factor	Pacing, anxiety, sleep, interruption, or stamina changed decision quality.

Fourteen-day repair cycle

Days	Work	Evidence required
1	Transcribe diagnostic; classify every remembered error	Three priority areas and one behavior target
2-4	Complete lessons and worked examples for priority 1	Two untimed sets at 80%+ with explanations
5-6	Priority 2, then mixed retrieval from priority 1	Accuracy holds after a 24-hour gap
7	Short mixed checkpoint and error audit	No repeated misconception left unexplained
8-9	Priority 3 plus Georgia distinctions	Georgia rules identified without national-default leakage
10	Math setup recognition and mixed calculation set	Formula and units named before calculator use
11-12	Timed mixed sets; review every option	Pacing stable and confident-wrong rate falling
13	Full simulation in exam-like conditions	Target score met without answer memorization
14	Light correction pass and retest decision	All gates below met

Retest gate

Two fresh mixed sets meet your target

Use unseen or sufficiently spaced items.

Georgia and national gaps are both checked

Do not let a stronger subtotal hide the other.

Confident wrong answers are rare and explained

These are more dangerous than low-confidence guesses.

Math setup is stable

Name base, formula, units, and rounding rule.

A full simulation fits your pacing plan

Use test-like conditions and no topic labels.

Exam-day logistics are confirmed

One ID, exact location, 30-minute arrival buffer.

Mistake log

Date	Area	Error type	Correction rule	Retry	Conf.

Sources, scope, and revision record

This independent study resource is not issued or endorsed by GREC or PSI. Official rules and your appointment instructions control if anything changes.

TRUST STANDARD

Built for verifiability

Every high-stakes number has an official source. Rules that vary by facts are framed as study distinctions, not personal legal advice.
